YX-630AA Automatic Labeling Machine for Metal Tins

YX-630AA Automatic Labeling Machine for Metal Tins characteristics:

The labeling equipment is for the round bottle labeling in the industry like food, oil, pharmacy, wine, cosmetics and so on. The machine with elegant design can be easily operated and maintained by the common worker, who requires no special training in operation this machine. Just give a simple adjustment to produce another product when you want to swap the different kinds bottle labeling. Hot coding function.

- The main body of equipment is made of SUS304 and advanced Aluminum products.
- The labeling heads is drive by the Server motor that is imported from Japan.
- All the light sensor equipment is imported from both Japan and Germany.
- PLC Controlled by the human-machine interface with 60 memory units.
- The machine is the best choice for single worker's operating.
- The machine has the function as bottle-uprighting, bottle-distributing, labeling, flattening as well as counting.
- The position, height, angle of labeling can be adjusted easily.
- Equipped with the conveyor belt, the machine is applied to set of the production line.

YX-630AA	
Labeling accuracy	±1mm (not including the label error)
Labeling speed	25~45bpm
Diameter&height of bottles	Diameter : φ25mm~φ120mm height : 25mm~300mm
Label size	Length : 20mm~290mm Width : 20mm~160mm
Overall size of machine	About 1950mm×1200mm×1530mm (L×W×H)
Supply power	220V/50HZ 110V/60HZ
N.W	About 185Kg
