

YB-XBC Automatic Weight Checker

The machine is used to detect whether the weight of single product is consistent with the set value, and the unqualified products are automatically eliminated by the sorting device.

1. The shell is made of stainless steel, PLC control system and touch screen display.
2. It adopts advanced high-speed digital signal processing technology in the world.
3. Up to 100 messages are preset, which is convenient for editing and storage. 2000 sorting logs can be queried and printed quickly.

Technical parameters:

Model	YB-XBC
Detecting speed	60-120 bags/min
Rejection device	Air injection/pneumatic arm/pneumatic draw stem
Power	150 W
Power supply	1ph 220V, 50/60Hz
Machine dimension	L850mm × W520mm × H1350mm
Machine weight	40kg
