

WB-280Y-4 Multi-lane Stick Pack Paste Packing Machine

Multi-lane stick pack Paste Packing machine compared with similar products on the market, it has incomparable outstanding advantages in terms of performance, quality, appearance, etc., and enjoys a good reputation in the market. Weibang summarizes the defects of past products, and continuously improves them. The specifications of Multi-lane stick pack Paste Packing machine can be customized according to your needs.

Feature

The piston pump used is suitable for materials with poor fluidity, such as pear paste, tomato sauce, mustard sauce, and other products. The liquid feeding pump can automatically transport the material into the barrel, which is convenient for the machine to carry out the next step. The workshop staff does not need to climb up and down to add materials to realize non-contact packaging, which is safer and more hygienic.

The machine also has a new heating and heat preservation function. During the packaging process, it is ensured that the paste material remains in a flowable state, and will not solidify due to temperature drop, block the pump, and affect filling.

High-quality well-known brands are used to ensure that the machine can work stably for a long time.

Powerful pneumatic, high-efficiency sealing: independent temperature controller controls the heat-sealing parts, pneumatically controls the operation, and the seal is tight without leakage.

There is an automatic color sensor on the roll film mechanism. It can automatically sense and identify the color mark on the packaging film to ensure that the machine can accurately seal and cut the bag in the subsequent packaging process.

Easy to use: You only need to click the relevant buttons on the color touch screen to operate the machine or set relevant parameters. It includes a one-key cleaning function for the material tank. It is more convenient for the workshop staff to clean the material tank.

Application

Suit to liquid or paste product: shampoo, mask mud, cream, ketchup, jelly, sauce, oil, energy drink, mouthwash, etc.

Technical parameter:

Model	WB-280Y
Lane number	2-6 Lanes
	(The number of lanes can be customized according to specific production requirements)
Filling method	Piston pump
Capacity	Max.50bags/min/lane
Bag size	L50-180mm;W17-65mm
Sealing & cutting type	Stick pack; Round cutting
	(Zigzag cut, flat cut and special-shaped cut can also be customized)
Power	3.5kw
Air supply	0.8Mpa 0.8m ³ /min;
Overall Dimension	1385*918*2005mm
Net Weight	350kg
