

HZSF Benchtop Powder Filling Machine

HZSF small powder filling machine is suitable for powder filling, such as pesticides, feeds, additives, flour, condiments and other products. This machine adopts PLC and touch screen control, which is stable and reliable in operation, high in repeatability and low in noise. Feel free to contact us if any questions regarding our products you would like to know.

Features:

1. Approximate speed 10-20 bottles/min (depending on operator speed, product density, filling speed etc.)
2. Easy to clean, maintain and operation
3. Hight adjustment, low repair cost, long services time
4. 2 different sizes nozzle for different filling volume
5. High repeat accuracy and low noise
6. All parts in contact with product are Food Grade 304SS (306SS customize)

Technical Parameters:

Model	HZSF
Power	1.5KW
Hopper	6L
Bottle volume	1-10g(Nozzle Dia:14mm) 10-30g(Nozzle Dia:23mm)
Bottle length	≤200mm(Customizable)
Filling accuracy	≤10g ±0.2g ≥10g ±0.3g
Filling speed	10-20 bots/min
