

Full Automatic Big Bag Given Salt Packing Machine

The Full Automatic Big Bag Salt Packing Machine is a game changer in the packaging industry, providing a modern solution for effectively and accurately packing salt into large containers. This state-of-the-art equipment blends pioneering technology with interfaces that are easy to work with hence making it easy to conduct business across many sectors. The device is constructed in such a way that it meets contemporary packaging needs; thus, as far as the packaging of salts is concerned, it implies ideal efficiency, accuracy, and hygiene.

Technical Specification

Feature	Specification
Packaging Material	Polyethylene, Polypropylene, Laminated Films
Bag Size Range	5 kg to 50 kg (Customizable)
Packing Speed	10 to 50 bags per minute (Adjustable)
Accuracy	$\pm 0.2\%$
Power Supply	220V/380V, 50Hz/60Hz, 3-phase
Power Consumption	4 kW (Approximately)
Air Pressure	0.6 MPa
Dimensions (L x W x H)	Customizable based on requirements
Control System	PLC Control System with Touch Screen Interface
Safety Features	Emergency Stop, Overload Protection, Safety Guards
Optional Features	Date Coding, Vacuum Packing, Nitrogen Flushing
