

JLF-3 Rotary Type Loose Powder Filling Machine

The machine is especially for loose type products. It adopts different filling to aim at different manufacture requirements. The ration is precision, cleaning is convenient and operator is easy. This new model has automatic weigher and working platform.

Features

- ◆ It adopts screw feeding, with automatic calibration function.
- ◆ Screw feeding adopts servo motor driven, high precision control system.
- ◆ Weighing sensor adopts German Brand.
- ◆ Operation system adopts human-machine interface system;
- ◆ Rotary type is easy to operate.

Technical Parameters

Model	JLF-3
Outer dimension	670*660*1405mm (L*W*H)
Voltage	AC220V,1P,50/60HZ
Power	0.4 KW
Air supply	0.6-0.8Mpa
Output	900-1800 psc/hour
Tank volume	26L (customization)
Weight	220kg
