

Tea Bag Packaging Machine

This machine is used in food, medicine, chemical industry, hardware, agriculture, local products, health products and other industries.

It has loose, non - viscous, granular material, inside and outside bags (with wire tape).

Applicable products such as tea, tea bags, scented tea, health tea, health products, bags and tea bags, double bags of tea and tea, Inside and outside bags, bags, tapes, etc.

Feature

- This product adopts microcomputer controller and large LCD screen display, with a new microcomputer touch screen technology, high intelligence and self Dynamic change.
- High accuracy of bag making, no level adjustment of bag length, easy to operate.
- Adopt thermocouple sampling, digital conversion and temperature compensation technology.
- The temperature is accurate and stable to ensure the sealing quality.
- Adopt pneumatic module sealing technology to make the bag flat and beautiful.
- The new adjustable exhaust device is adopted, which greatly improves the exhaust effect.
- Simple structure, complete specifications and convenient replacement.
- It is extremely simple to adjust the controller with inner bag, outer bag and label length.
- Adopt new type of system, paper structure and convenient operation.

Technical Parameter

Model	DXD. Dc-10-1	DXD. DC-10-22
Dose range (ml)	1-20	1-20
Bag size (mm)	Inner bag: length: 50-60; Width:50-70Outside bag: length:80-100; width: 60-100	Inner bag: length: 50-60; Width:50-70Outside bag: length:80-100; width: 60-100
Label size (mm)	Length:25-35 ;width:20-30	
The length of the lead(mm)	180	
Maximum packing speed (bag/minute)	30	30
Maximum power (kw)	3,35	3.15
Overall dimensions(mm)	1300 * 910 * 2100	1150 * 910 * 2100
Maximum machine weight (kg)	540	540
