

## *LB-350 Automatic Feed Packing System*

LB350 feed packing system is mainly composed of arranging and conveying unit, a material blocking unit, a steering unit, packaging machine, labeling system composed by arranging and conveying unit, the materials are flexible shunt, finishing queue; the material blocking unit products will be assigned to the preset each receiving unit, feeding unit product order; tail frame smooth, no damage to enter the packaging machine to complete the packaging by servo feed packing for bread cake, cookies and other similar products, can be carried on the product surface finish turning by flipping unit.

### **Features**

It can be used for the storage and transportation of products, Double differential sorting. Stable feedback 304 stainless steel surface design, fashionable plexiglass partition: Remove the tool free, Simple, compact structure, easy to clean PU belt conveyor design, can be used for the trayless product transport.

## Technical Parameters

Model	LB-350
Reload speed	35-150(包/分)×3
The total power	5kw×3
dimension of machine	9000×4000×1600(mm)
The qualified rate of loading	≥98%
The type of power	220V 50Hz
