

XT-520 Automatic Bag Packing Machine

Features:

1. Equipped with safe protection, comply with safety management requirement.
2. Adopts intelligent temperature control, beautiful sealing quality.
3. Adopts PLC servo system, pneumatic control system, big touch screen display control center, greatly improve the machine control precision, reliable and high intelligence.
4. The touch screen can remember different product specification, when change product, no need the set the parameter again.
5. If fault happens, it will automatic alarm and stop.
6. It can be customized according to customer's requirement.
7. Finished bag conveyor belt

Technical parameter:

| Model | XT-520 |
|----------------|--------------------------|
| Bag size | (L)80-350mm, (W)80-250mm |
| Packing speed | 10-40 Bags/Min |
| Voltage | 220V, 50-60Hz, 3.0 Kw |
| Compressed air | 6-8 kg/m2 |
| | 0.15 m3/min |
| Weight | 500 Kg |
| Dimensions | 1050×850×1200 (mm) |
