

UN-150 High Efficiency Check Weigher

Products suitable for terminal process inspection on packaging assembly lines provide a more economical solution for simple online weight inspection requirements, with characteristics such as fast detection speed, high measurement accuracy, and strong expansion performance

Feature:

1. Reinforced stainless steel frame, all water-proof design,
2. It adopts Germany HBM high accuracy sensor, it is based on the most advanced digital signal processing technology, high speed is realized and stable checking,.
3. Dynamic weight automatic compensation technology, 0 point automatic analysis and trace technology,
4. It has 50 groups of product preset, simple product edit and storage,
5. Quick product changing-over and automatic adjust the correspondent product sorting speed,
6. Convenient USB test data, copy, storage function (options),
7. Color LED touch screen operation system, multi language operation interface, simple operation,
8. It can optionally match scanning system and automatic inkjet printer.

Technical Specifications

Weighing range	3g-300g
Conveying speed(meter/minute)	5-85m
Max. speed(bags/minute)	70bags
Standard accuracy	±5g

Width of conveyor belt	150mm
Reject method	Rejected by pushing rod
Product preset mode	50 group
Power supply	220V50HZ, single phase
Power	140w
Air pressure connection size	8mm
Levels of protection	Meets IP-30(PB)international standard
	(water-proof model meets IP-66 international standard)
Weight	95kg
The height from the floor to the conveyor belt	730±50mm(can be customized according to actual condition)
