HP-450I / HP-600I Horizontal Digital Flow Wrapper

The digital horizontal packaging machine features a 5.7-inch microcomputer HMI touchscreen, allowing easy control and operation. It can store packaging parameters such as temperature, bag length, and packaging speed, with memory capacity for 50 or 100 sets of settings. The machine is designed for easy maintenance and can be integrated with basic automation systems to enhance performance.

Features

- User-friendly human / machine interface control with 5.7inch touch screen for convenient operations.
- Dialogue type screen provides maximum operation convenience and is easy to learn.
- Memory function makes the machine ideal for flexible packing operations.
- Self-diagnostic function permits convenient troubleshooting.
- Specially designed feeding system is available for packaging soft and sticky products.
- 50 sets of the recipe for easy production changeover.

Specification
