

CGF2-2-1 Big Bottle Water Filling Production Line

The big bottle water filling production line are composed of washing, filling, capping, which has high productivity and easy maintenance. The water filling production line can apply to fill 3-10L natural spring water, purified water.

The water filling machine adopts advanced PLC control technology. The key electric elements adopt Mitsubishi, Omron, Siemens, etc international famous products.

The water filling machine can process from empty bottles to finished products on one single machine, which is high efficient, energy-saving and sanitary.

Parameter

Model	CGF2-2-1
Filling volume	3-10L
Machine type	Linear type
Washing heads	2
Filling heads	2
Capping heads	1
