

MIC-35C Box Packer Machine

For businesses looking to streamline their packaging process, MIC Machinery offers the MIC-35C Box Packer Machine, a high-performance auto box packing machine designed to handle 10-14 cartons per minute with precision and efficiency. This packing machine for boxes is perfect for industries requiring automated, fast, and reliable case packing to enhance productivity.

Key Features of the MIC-35C Box Packer Machine

The MIC-35C box packer machine is equipped with advanced technology to ensure smooth and efficient packaging.

1. High-Speed Carton Packing – Handles 10-14 cartons per minute, optimizing production efficiency.
2. Automated Box Packing – Reduces manual labor and enhances packaging consistency.
3. Versatile Box Compatibility – Accommodates various carton sizes and materials.
4. Compact and Space-Saving Design – Ideal for integration into existing production lines.
5. User-Friendly Operation – Touchscreen control panel for easy setup and adjustments.
6. Durable and Low Maintenance – Built with high-quality materials for long-term use.

Advantages of the MIC-35C Auto Box Packing Machine

1. Increases Production Efficiency

The MIC-35C auto box packing machine is designed for fast and efficient case packing, helping businesses increase output while ensuring packaging precision.

2. Reliable and Consistent Packing

With its automated operation, this box packer machine ensures each carton is properly packed, sealed, and ready for distribution.

3. Cost-Effective Automation

Automating the case packing process with the MIC-35C packing machine for boxes helps manufacturers reduce labor costs and minimize errors.

4. Flexible for Multiple Industries

This auto box packing machine is suitable for food, beverage, pharmaceutical, cosmetics, and industrial packaging applications.

5. Space-Saving and Easy to Maintain

The compact design of the MIC-35C box packer machine allows for easy integration into various production lines, while its accessible structure simplifies maintenance.

Parameter

Name	Case packing machine
Production capacity	10-14 case/ minute
Hot glue solidify time	≤1.5-2S
Weight	3.5T
Machine overall size	6285*2582*2115
Bottle enter size	3000*620*1200
Power supply	380V,three-phase
Power supply	220V AC
Main machine power	10KW
Gas consumption quantity	1500 L/min
Compressor air requirement	0.6~0.8MPa
Package product	(350-450)
Overall size	
Cardboard specific requirement	Material: corrugate, carton indentation thread thickness is moderate, width is not bigger than 2mm
