

YL-SG Stainless Steel Automatic Bottle Cap Feeder with Sorting Elevator for Capping Machines

The YL-SG Automatic Bottle Cap Feeder Elevator with Lid Sorting Conveyor delivers a robust and efficient solution for high-speed feeding and sorting of plastic and metal caps in beverage, cosmetic, and food packaging lines. Constructed with a stainless steel frame and powered by a reliable electric motor, this feeder handles 60-120 caps per minute, easily elevating lids of 25–60 mm in diameter (customizable to 65–110 mm) into the capping system. Featuring a wear-resistant plate chain for extended durability and a stable, slow conveying speed, it ensures smooth and consistent delivery. Engineered for easy operation and minimal maintenance, the YL-SG is an ideal choice to boost automation efficiency in medium to large-scale production environments.

Technical Parameters

Model	YL-SG
Capacity/h	60-120 pcs/min
Power	0.37KW
Voltage	AC220V 50HZ
Machine size	1300*600*2000mm
Weight	80KG
