

DDX-450 Semi Automatic Desktop Electric Screw Capping Machine for Plastic Glass Metal Bottle

The DDX-450 Semi Automatic Capper is a versatile solution designed to streamline your packaging process. Whether sealing beverages, chemicals, or cosmetics, this machine significantly reduces labor costs and physical strain while ensuring consistent capping quality.

Precision Control and Cap Protection the DDX-450 Desktop Capping Machine offers adjustable torque and speed settings. For caps with fewer threads, you can easily lower the speed to ensure a perfect fit without damaging the cap surface. This level of control makes it ideal for a wide variety of cap materials and designs.

Integrated Stability and Safety Stability is paramount in production. The DDX-450 Electric Screw Capper features a specialized fixing frame that secures the bottle during the cycle. This prevents tipping and ensures a centered, professional seal every time.

Versatile Application Spectrum This machine is remarkably versatile, handling plastic, glass, and metal bottles alike. It is also fully compatible with security ring caps, making the DDX-450 Semi Automatic Machine a comprehensive choice for food, beverage, and pharmaceutical industries.

Technical Parameters

Model	DDX-450
Working voltage	AC 220V 50/60HZ
Power	50W
Work method	Electric capping object hand
Production capacity	20-40 pcs/min
Bottle high	40-200mm
Bottle diameter	10-50mm
Machine size	520*300*530mm
