

CSJ Series Universal coarse Crusher

The machine is applied as supporting equipment, before run crushing process in trades as pharmaceutical, chemical and foods ruffect it specially grinds the hard and solid granule materials like plastic materials and cooper wires. Also it can be the pretreatment coordinated machine for fine grinding process

Working Method :

This machine of horizontal crushing structure and the material id fed into the crushing chamber through a hopper, crushed by cutting and impact of both fixed and rotating knives, and flowed to the exit automatically under the effect of rotating centrifugal force. Designed according to GMP standard and wholly and low noise, being the ideal equipment for coarse crushing.

Technical Data :

Model	CSJ-200	CSJ-400	CSJ-600
Capacity	50-200	100-500	150-700
Size of input granules	≤100	≤300	≤420
Size of output granules	0.5-20	0.5-20	0.5-20
Power	4	5.5	11
Speed of principal axis	500	500	500
Overall Dimensions (L×W×H)	600×500×1100	780×800×1300	890×900×1600
Weight	320	500	620
