

## *VCX-6 Automatic Rotary Capping Machine*

VCX-6 Automatic Rotary Capping Machine is used in various configurations containers, irregular containers. It is each big, medium-sized packing workshop ideal choice. The max capping speed can reach 100 bottles/min.

### **Features:**

1. This machine has six mechanical hands, dispatches caps in high speed with no inverse cap
2. Integrating into the bottle, Richard cover, roof, capping and out bottle and integration, using catch cover locating screw cap
3. Long service life of the parts, smooth running, low noise, wide application scope, high capping rate
4. The surface polishing treatment, more beautiful
5. Production speed variation adjustable, beneficial to the fittings production line

### **Technique Parameter:**

main unit dimension (L×W×H)	2000mm×1300mm×2400mm
weight	980kg
suitable specification of container	diameter : Φ40mm-Φ100 mm height : 80mm~280mm
suitable lids	height : 10mm~35mm diameter : Φ20mm~Φ80mm
power supply	AC 380V ; 50Hz
power	3kw
pneumatic (air-operated)source	0.6MPacean and stable compressed air
filling heads	6heads
production capacity	6000 bottles/hour
