

Automatic Bottle Filling Machine

Automatic Bottle Filling Machine is suitable for granule automatic bottle and can filling. It is suitable for packing granule and powder automatically, such as edible salt, baby food, snack food, powder, oatmeal and etc. Automatic Bottle Filling Machine works stably with great efficiency.

Technological process:

Convey the empty bottle (Empty bottle conveyor)--Arrange the bottle (Automatic bottle arrange machine)--Rotary bottle filling machine--Material loading (Connect with storage bin or DT1 ELEVATOR)--Automatic weighing machine (Auger metering filling machine)--Automatic feed the cap--Automatic capping--Convey to the Labeling machine--Finish the pack

The unit has the following advantages

1. Automatic Bottle Filling Machine adopts LCD display and set parameters;
2. Automatic Bottle Filling Machine adopts unified electric control system to ensure the easy and reliable operation;
3. As to the weight setting, it can set by pressing the set button on the control panel and also can alter the parameter in the unstop situation.

Technical parameters:

Item	parameters
Supplies	Seasoning, salt, sugar, condiment, spice, etc.
The cap dia.	50-80 mm
Bottle capacity	50-350 g
Speed	50 bottles/min
Accuracy	±0.2%
Power source	220V 50HZ 3-5KW
Elevator capacity	500 kg/hour
