

**RS - 4535 type heat shrinkable machine**

Product introduction: intelligent temperature controller; Enhanced delivery of motor transport smoothly; High-power air cooling motor, strong cold effect; Quartz furnace ultra red rays tube heating, save electricity, shrinkage effect is good. All use solid roller conveyor chain cudgel, external set of silica gel, can withstand the weight of the object and shrinkable film is not easy to burn Apply to all kinds of thin film contraction, especially PE film.

**Technical parameters:**

| Model                              | RS-4535           |
|------------------------------------|-------------------|
| Mains input                        | 220V/380V 50-60HZ |
| Heat tube power                    | 18KW              |
| Conveying speed                    | 0-10m/minute      |
| Shrinkage furnace size (L * W * H) | 1200*450*350MM    |
| Dead weight capacity               | 25KGS             |
| Machine size                       | 2200*730*1440MM   |
| Shrink film                        | PE,POF,PVC,PP     |
