

Granule Weighing Packing Machine YSDC-B2/B4

The granule animal feed packing machine is used to snack food, hardware, salt, MSG, chicken essence, seeds, rice, pesticide, fertilizer rice, veterinary medicine, feed premix, additives, and other granular quantitative packaging materials.

1. High precision digital sensors, so the granule animal feed packing machine can realize precise metering soon;
2. The microcomputer control system of granule animal feed packing machine adopts advanced technology, easy to operate, more reliable;
3. Speed vibrates the feeding automatic revision error, so granule animal feed packing machine realize high precision for packing;
4. This system granule animal feed packing machine has both two weighed and four weighed model, work alternately, fast packaging;
5. The part touching with the material of granule animal feed packing machine adopts the high quality stainless steel, corrosion dustproof, easy to clean;
6. Strong compatibility, the granule animal feed packing machine is easy to match with packing equipments;

Technology parameters:

Weigher	Double	Four
Model No.	YSDC-B2	YSDC-B4
Packing specification:	50-2000g	50-4000g
Packing speed:	1200-2000 bags/hour	1800-2500 bags/hour
Accuracy grade:	1.0	1.0
Power and volt:	AC220V 50Hz 500W	AC220V 50Hz 500W
Total weight:	100kg	180kg
Overall size:	600*600*1850mm	1250*910*1850mm
Packing container:	plastic bags, fabric bags, paper bags, wide-mouth bottles, .etc.
