

## ***Semi Automatic Pneumatic Operated Paste/Cream Filling Machine SPF-100***

### **Technical Data:**

Application: Any type of paste / Cream

Contact Parts: Stainless steel

Output: 15-20 Fills/ Minute (Depending upon the material characteristic and filling volume)

Filling Volume: 5 Gram to 100 Gram

Air Pressure: 4.5 K.G.

Hopper Capacity: 5LTR/ 10 LTR/ 20 LTR

M/C Dimension: (L) 750 mm (W) 450 mm (H) 900 mm

### **Features:**

- Compact Design, Fast Output with pneumatic system
- Suitable Nozzle is provided for accurate filling of volume
- Contact parts are in stainless steel rack
- Digital control panel
- Flexible tube holder for different size of tube
- Foot operated function for avoid wastage wide packing range in single compact machine

The paste filling machines are specially designed to fill and partly pack the semi-liquid items. The machines are fabricated by the Arrowfill Pack Machinery, the Ahmadabad based organization uses standard quality of material. The machines are also customizing as per requirement. The speed of the machines can be varied depending upon the dimension of the pouch or sachet. Also, it can be varied in length, width and diameter. paste filling machine is equipped with standard clutch and break. It is also equipped with precision control.

The advance technology and dedicated staff made this product a highly demanded in the market.

- low maintenance
- flawless operation
- low power consumption
- precision control
- highly accurate
