

Hot Air Circulation Furnace AP - 221044

1. Double furnace design, the furnace is divided into two temperatures, and the temperature can be controlled separately.
2. Dual heat circulation system, which can control wind speed at two temperatures respectively.
3. For explosive products such as aerosol cans, the positioning device in the furnace can be added to block and explode textile products in the furnace.
4. The transmission speed can be up to 50m/min
5. Type of AP - 221044
6. Shrinkage zone size L1100 X W550 X H250mm
7. Mechanical dimension L1550 X W750 X H1525mm
8. Voltage 380 v / 3 ph
9. Power 12 kw
10. Mechanical weight 250kg
