

## ***Blister Packing Machine DPP-140G***

Blister Packing Machine is on the basis of DPP-250F and widely absorbing the feedback information from customers and the advantages of same-type products at home and abroad. It is strictly made conforming to "GMP" standards. A waste material collecting device has been designed to add up to this machine which can make the function of the whole machine more perfect.

**Adjustable stroke:** Freely change the size of sheet and suitable for the production of various kinds of specifications.

**Plate-type construction:** It is suitable for packing the matter of any shape such as the special matters of square, triangle and oval shape etc.

**Positive pressing formation:** That makes the bubble of cap wall uniform, stiff and smooth and makes the packing finished products standard and beautiful.

Shaping, feeding, heat-sealing, pressing, lot number printing and cutting can be completed automatically in one move.

**Material recovery device:** It can auto medically recover a whole roll of waste material.

Blister Packing Machine is suitable for blister-type aluminum-plastic and paper-plastic sealed packing of such articles as capsule, tablet, syringe and hardware, etc.

**Technical Parameter:**

Punch Frequency	20-40 Times/min
Standard Block Plate	57*80mm
Adjustable range of stroke	40-110mm (Control freely)
Air compressor	≥ 0.15 m <sup>3</sup> /min(Provide for yourself)
Total Power	1.5kw
Heating Power	3.1kw
Rated Frequency	50Hz
Rated Power Supply	AC380V(3 phases 4 lines)
Weight	1200kg
Overall Dimension	L*W*H 2550*800*1500mm
