

Automatic BOPP Carton Over Wrapping Machine CK-BTB-300A

The automatic carton overwrapping machine is widely used in three-dimensional packaging of box-type articles in the pharmaceutical, food, cosmetics and other industries. The over wrapping machine adopts the design idea of machine and electric integration, PLC programming control, man-machine interface, easy adjustment, equipped with protective cover, configurable tear tape device, in line with CE certification.

BOPP Over Wrapping Machine Features:

- High-speed feeding system: cam driven, segmented moving feed, reducing waiting time and accelerating feeding speed.
- High-speed delivery bopp film system: servo drive, adsorption movement mode, and speed up transmission.
- Precise positioning system: the bopp over wrapping machine with adjustable packaging high-speed feeding buffer mechanism for precise positioning under high-speed movement.

- High-speed transmission system for packaging: the automatic carton overwrapping machine adopts circulating transmission and discharging system to ensure that the package can be conveyed smoothly under high-speed movement.
- Wide range of package sizes and easy to adjust to complete different sizes of packaging.
- Automatic stop function, automatic shutdown without packaging or machine abnormality.
- Equipped with tear tape device and electric eye device for color packaging.

Automatic Carton Overwrapping Machine Function:

1. Security/moisture proof.
2. Increase the added value of products/improve the grade of products/improve the decoration quality of products.

As a manufacturer, our company carefully collected and integrated the opinions of the majority of users, and through continuous research and improvement, adopt the most advanced technology improvement and strict quality control. It makes our bopp over wrapping machines more precise and reliable, light and durable, easy to operate, and precise and close packaging.

To ensure the maximum role of the machine and the longest life, to ensure that customers in the cost of investment, can get the maximum benefits and returns. Therefore, our over wrapping machines have been the majority of customers praise.

Model	CK-BTB-300A
Packing Material	bopp film
Packing Speed	40-80boxes/min
Max Packing Size	L 240*W 120*H 60 mm
Voltage and Power	220V 50Hz 5kw
Machine Weight	500kg
Machine Size	L 2000*W 700*H 1400 mm
