

## *Automatic Front and Back Labelling Machine*

Our automated front and back labelling systems are extremely durable, efficient and easy to operate. This front & back labeller can be installed quickly and contains no change parts to be adjusted providing easy operations and low maintenance. Equipped with intelligent technology, Worldpack front and back labellers can label up to 300 bottles per minute. The labeller system comes equipped with a colour touch-screen for easy accessibility. The precise technology used to design the labeller makes sure that the labelling is precise on single side and double side even when executed simultaneously on different types and shapes of products. The synchronized VFDs make it possible to adjust the labeller's speed providing single point control. The device also remains secure with a 3 level password protection.

### **Applications**

## Technical Specifications

SPEED	60 TO 300 BPM
ROLL O.D.	300MM
LABEL MATERIAL	PAPER/FILM/PP/PE
MOC	SS 304
POWER SUPPLY	220/50HZ
POWER CONSUMPTION	3KVA
OPERATING SYSTEM	MICRO CONTROLLER BASED/STEPPER PLC/SERVO PLC
MACHINE SIZE	2500MM X 2000MM X 1800MM (LXBXH)
WEIGHT	350KGS
PRINTER	TIJ/TTO/CIJ CAN BE INTEGRATED WITH THE MACHINE SHROUD OPTIONAL
