

Pneumatic Capping Machine

This machine is suitable for all kinds of rules glass or plastic bottle of all kinds of outer cover automatic twist, use the grab cover to grab the various LIDS that are conveyed by the scraping plate, and complete the outer cover in the bottle turning process. The whole machine adopts PLC control, HMI, convenient and easy to operation.

1. Rack: the bottom plate is high precision carbon steel thick plate and thickened square tube, and after welding, it is treated with anti-rust, and the 304 # stainless steel plate is outsourced.
2. Main accessories: stainless steel, anodized aluminum alloy, engineering plastics.
3. Conveyor belt: the side board adopts 2.5mm 304 # stainless steel

Technical Parameters:

Type	Production capacity	Size of Machine(mm)	Power	Power source	Air source
4 heads	≤3000 bph	2400*1400*2200	2.5kw	AC 220/380V;	0.6-0.8Mpa
6 heads	≤5000 bph	2400*1400*2200	3kw	50/60Hz	
8 heads	≤7000 bph	2400*1400*2200	3kw
