

Automatic Twist Off Glass Jar Vacuum Capping Machine / VTOPS-C-V

Automatic twist off glass jar vacuum capping machine is used for tinplate caps' vacuumizing and capping in glass jars. It integrates automatic caps arrangement, automatic caps loading, automatic vacuumizing and automatic capping into one machine. When there is no bottle, there will be no caps sending, and when there is lack of caps, the machine will have an automatic alarm and it also has other functions.

Parameters:

- Model: VTOPS-C-V
- Applicable Jars: D: $\phi 30$ - $\phi 85$ mm / H: 80-250mm
- Applicable Cap Diameter: $\phi 38$ - $\phi 55$ mm
- Capping Speed: ≤ 3600 bottles / hour
- Air Pressure: 0.6 ~ 0.8 MPa
- Air Consumption: 100 liters / min
- Power: 3P AC380V 50Hz 3.5Kw
- Weight: 700 kg
- Dimension: 3000 \times 1000 \times 1900 mm
