

Automatic Box Cellophane 3D Packing Machine WS-350B

This equipment is mainly used for transparent film three dimension wrapping of single piece or multi piece square object in such industries as medicine, cosmetics, health products, food, etc.

Performance Features

1. This 3D packing machine is elaborately designed and modified on the basis of absorbing and digesting advanced machine from abroad.
2. It adopts PLC control, its controlled by servo motor. The film length can be set freely
3. Sealing part is firm, neat and beautiful. Th product is anti-counterfeiting, moist-proof and dust-proof effects.
4. The 3D packing machine is stable running, compact structure, simple operation and convenient maintenance.
5. It can replace heat shrink packaging machine.

Technical Parameters

Model	WS-350B
Speed	15-40Bags/minute
Carton Size	L50-300*W40-220*H10-90mm
Voltage	220V/50HZ 380V/50HZ
Total Power	3.75KW
Equipment Size	Main Machine L2200*W960*H1760mm Conveyor Table L1500*W200*H880mm
Compressed Air Pressure	0.6Mpa
Weight	750kg
