

## *Sy-53 Syringe Round Face Rapid Silk-screen Printing Machine Generating Centrifugal*

### **Feature**

1. The equipment employ one mesh two printing, Double spray gun spray oil, etc.
2. The equipment has functions for sending material automatically, printing, drying, spraying silicon oil, etc to different syringes.
3. The equipment adopts PLC control, Touch screen operation, photoelectric control and imported speed-regulator.
4. The equipment has high-pressure spray gun and tank ,using imported spray gun .it is with stable performance and spraying evenly.
5. The equipment is advantage is quick convey speed, small swinging range, lengthening dryer length, heating up double ways, automatic air return can make for drying result ,reducing heating TIM and stable performance, etc.
6. The parts which approaching the product is made of 304 stainless steel, the convey belt is approved food specified convey belt FDA certification, other parts disposed Anti-corrosion, the equipment would not cause the pollution to the product and clean area.
7. The equipment can realize continuous and normal production for 24 hours.

### **Technical parameter**

Assembling area	1ml	2ml	5ml	10ml	20ml	60ml
Assembling speed (branches/min)	150	180	180	180	170	160
Input	220V50HZ					
Machine size	350X150X220cm					
Power	6kw					
Weight	800kg					
Air pressure	0.2-0.4MPa
