

Automatic Aluminum Cap Crimping Machine NP-AC-2

The rotary capping machine adapts 2 capping or snapping nozzles for packaging lines. It is flexible and durable and works with most containers and caps including flat caps, sport caps, metal lids and so on.

This Automatic Aluminum Cap Crimping Machine is suitable for closing aluminum caps like pilfer-proof aluminum caps.

PLC control system, rotary type structure, the machine is with function of automatic cap feeding, loading and crimping.

Brief Introduction:

- This Automatic 4 Head Aluminum Cap Crimping Machine is suitable for closing aluminum caps like pilfer-proof aluminum caps.
- PLC control system, rotary type structure, the machine is with function of automatic cap feeding, loading and crimping.
- The crimping head is made up by strong stainless steel, by 4-wheel balance principle design; the crimping force is uniformly which makes good sealing effect.
- Bottle feeding star wheel equip with clutch device, machine stops automatically if bottle get stuck.
- And there is automatic positioning device for bottle neck which assures the capping accuracy and stability.

Technical Parameters:

Model	NP-AC-2
Capacity	50-60/Minute
Suitable cap	metal ROPP cap
Yield of cap	99%
Dimension	2000x1000x1500mm
Power consumption	0.8KW
Weight(kg)	350kgs
