

## *BTZ-100D Paster Paper Brand Labeling Machine*

Automatic Wet glue paper brand labeling machine is suitable for all kinds of cylindrical objects, such as glass bottles, Plastic bottles.

It can work separately or connecting with conveyer. Label box can be controlled to satisfy different labeling request.

The size of label box can be changed according to the different label size. The operation is convenient and easy.

It uses the glue pump and the glue can be used circularly. Quantity of flowing glue also can be changed to satisfy different labeling request. Compare to self adhesive labels, Paper label make a low cost.

### **Feature:**

- Operation : PLC control system makes labeling machine easy to operate
- Material: Labeling machine's main body is made of SUS304 stainless steel
- Configuration: Our labeling machines adopt Japan motor driving and photo sensor and Taiwan control system

**Parameters:**

<b>Model</b>	<b>BTZ-100D</b>
Operating direction	Left or Right
Labeling Accuracy	1.0mm (Subject to the roughness of the plane)
Capacity	30-80 bpm (base on bottle size and label)
Application bottle	Outer diameter 40-100mm Height 35-200mm (can be customized)
Application label	Width8-150mm; lenght 20-280mm (can be customized)
Power	1KW
Voltage	AC220V 50/60HZ single phase
Machine size	2500*900*1270mm(L*W*H)
