

VFFS-5000 GD Automatic Packaging Machine

VFFS-5000 GD automatic VFFS packaging machine can make three-side sealing bag such as pillow bag, ruffled bag, hole-punching bag, etc. This machine can pack granule, powder, flaky material, pelletized material and irregular material when equipped with different kind of weighing machine.

Products Features:

- This machine can automatically realize functions of bag-making, filling, sealing, printing, hole-punching, counting, etc.
- Machine pulling the film by double-servo motor,
- It has automatic bias-adjusting function. There are three kinds of cutting knife: Flat type, toothed type, dash dotted type.
- Horizontal sealing system is driven by servo motor.
- Whole machine is controlled by PLC, all the components of PLC is from international famous brand.
- VFFS5000GD is a continuous type packaging machine, ongoing film-pulling system improve the packaging speed greatly.

Technical Parameters:

packing speed	50-120 bags/min
bag shape	pillow bag, gusset bag, hole-punching bag
bag size	(50-500)*(65-260)mm (L*W)
Reek outer dia	Φ650 mm
Core inner dia	Φ75 mm
Machine weight	950kg
Power source	380V 50~60HZ 8KW
