## *Small Dose Tea Powder Automatic Packaging Machine*

The small dose powder packaging machine is a packaging equipment that can automatically complete measurement, filling and sealing, etc., and is suitable for measuring those particles that are not easy to flow or powdery and granular materials with poor fluidity. High precision quantitative packaging machinery can automatically complete functions such as metering, filling, bag making, sealing, cutting, counting, and date printing.

### **Technical Parameters:**

- Production capacity (bags/min) 20-40
- Packing capacity (ml/g) 1-1500
- Overall power (kw/V) 2.2/220
- Bag size length (mm) 120-230
- Bag size (mm) 100-150
- Machine weight (kg) 500
- Dimensions (mm) 1290×820×1500
