

6 Head Automatic Liquid Filling Machine AT6T-6G

AT6T-6G is designed on the basis of this company's series products with extra functions increased. The product is simple and convenient in operation, error correction, machine cleaning and maintenance.

Widely used for filling various kinds of highly viscous fluid in the industries of daily chemicals, foodstuffs, pharmaceuticals and oil.

With two synchronous filling heads, quick and accurate filling possible

With Germany FESTO and Taiwan's AirTac, SHAKO pneumatic elements and Taiwan's electrical control parts adopted, its performance is stable.

Quality guaranteed by employing Korean AUTONICS photoelectric eyes, Taiwan's PLC, touchable screen and frequency inverter, and Schneider Electric Co. electrical elements.

Compact design, attractive appearance, convenient installation and filling adjustment, no missed filling and accurate filling dosage with a counter provided.

Closure head preventing leakage and wire-drawing, filling elevating system preventing high froths, bottle top positioning system and liquid level control system provided.

Automatic liquid filling machine. It is made with electric, mechanical and pneumatic principle. Use counter to control the filling volume and designed with special filling nozzle to reduce bubble when filling. It is widely used for foodstuff, chemical and medicine filled etc. We can accord to customer's requirements to design the filling volume.

Full automatic straight line type 6 rotary head liquid filling capping machine, is the use of PLC optical fiber sensor and electronic control, automatic filling, automatic sorting - automatic rotary capping. Bottle filling. Stop filling no bottle. And a counting function. The output of the month - day record down.

The device with machine labeling machine line. Line 6 head filling machine this machine is used to sneak into the filling machine, filling head automatic filling into the bottle slowly increased, so that the liquid does not overflow, no bubble, after filling the bottle cap automatic Gary messy irregular, ordered automatic hanging on the bottle, then screw capping lid - will automatically enter the next

procedure. The device is applicable to liquid filling equipment. The surface of 304 stainless steel, easy to clean. No dead, fully meet the requirements of the national standard GMP.

Introduction:

Semi Automatic Manual 304 Stainless Steel Food Paste Filling Machine Price is a semi-automatic filling equipment, based on factory is introduction of advanced filling machine technology in Europe and America, transformation and innovation of the product

The material contact part of machine is made of 304 stainless steel, removable, simple and reasonable structure, High filling accuracy, Easy to operate;

The machine can be foot-operated or photoelectric switch control filling and can be automatically filled online.

Applications:

Semi Automatic Manual 304 Stainless Steel Food Paste Filling Machine Price is suitable for a variety of viscous materials, widely used in pharmaceutical, chemicals for daily use, food, pesticides and special industries, is the ideal Medium and high viscosity fluid filling equipment.

Parameter:

- Powe supply 220/110V50/60HZ
- Sir pressure 04-06mpa
- Filling speed 40-80 bottles/min
- Filling accuracy $\leq \pm 1\%$
- Filling volumes range 5-100ml 10-280ml 20-500ml 100-1000ml 500-2800ml 1000-5000ml
- Filling heads 2.4.6.8.12(According to requirements)
