

DPA-4030 Corrugated Box Packing Machine

Product line description:

1. It adopts international advanced technology to manufacture and select imported parts, electrical components and pneumatic components;
2. Manually adjust the width and height according to the carton specifications;
3. Belt drive on both sides, sealing up and down at the same time, economical, fast and stable;
4. Equipped with blade guards to avoid accidental stab wounds during operation;
5. Can be a single machine operation, can also be used with the automated packaging line

Feature:

1. Using international advanced technology manufacturing, and use imported parts, electrical components.
2. Manually adjust the width and height according to the carton specifications.
3. Automatic left and right folding, up and down sealing, economical, fast and smooth.
4. Equipped with blade guard to avoid accidental stab wounds.
5. Can be alone work, but also can be used with the automated packaging line.

Specification:

Model	DPA-4030
Transfer speed	0-20m/min
Maximum package size	L~xW300xH400mm
Minimum package size	L150xW80xH90mm
Power consumption	180W
Power supply	220V 50Hz
Tape width	W36-50mm(Alternative use)
Package size	L1020xW850xH1350mm(Without front and rear roller frame)
Machine weight	130KG
