

Filling Machine RGZ-6

Features

1. Controlled by Panasonic servo system
2. Controllable and various filling speed
3. Integrated digital control with Mitsubishi PLC and Touch Screen controls
4. Designed for easy change-over and cleaning
5. GMP standard Stainless Steel
6. No bottle-no fill system
7. Warning light and buzz to inform operator production error
8. Quick change of volume with digital readout
9. Individual piston adjustment for fine tuning
10. Fully automatic rise for nozzles, adjustment can be done on touch screen
11. Nozzles can set to be above bottle mouth or bottom up, synchronizing with liquid level(beneath or above) to eliminate bubbling of foamy liquids
12. Adjustable speed while filling, it can fill slowly at the beginning and then accelerate to faster speed, finally slow down once again to finish up, This can prevent foamy liquids from bubbling and avoid spillage

Specifications

Filling Capacity	20-100cc/50-500cc/100-1000cc
Contact Part Material	304/ 316L
Supply Voltage	220 / 380V,50-60 ,3 Phas
Power Consumption	1.5KW
Air Pressure	4-6kg
Dimension	3000*950*1770mm
Filling head Options	2/4/6/8/12/16/20
Precise	±0.5%
Power source	220V;50Hz
Air source	0.6MPa
