

RS - 1000 liquid packing machine

Machine features: all the wrapper: ultraviolet sterilization, bag molding, print, quantitative filling, sealing, cutting, counting automatically completed, the heat sealing temperature adopts the automatic control, is not affected by power grid voltage, after packaging products beautiful and strong, the whole machine adopts stainless steel structure, to ensure that meet the national hygiene standards. A and B type machine adopts single polyethylene film, C type machine adopts composite membrane, which type B machine for double tube (double color double flavor), can at the same time filling in A pack of two liquid, two kinds of color, flavor, C type machine is divided into the sealing, edge sealing and photoelectric control

Applicable industry: the machine is widely used in milk, soy milk, drinks, soy sauce, vinegar, rice wine, edible oil, detergent, chemical products, such as all kinds of liquid film packaging.

Technical parameters:

Model	RS-1000A	RS-1000C
Production rate	1500-2100 Packages/hour	1000-1800 Packages/hour
Capacity packing	100-500ml	100-1000ml
Package size	L30-150*W120-160mm	L30-240*W120-160mm
Machine Power	1.2KW220VAC/380VAG	1.2KW220VAC/380VAG
Total weight	270kg	330kg
Boundary dimension	850*800*1800mm	1050*850*1850mm
