

DXDL Vertical Packing Machine

This is a multi-function packing machine for paper bags and plastic bags, which combines the latest packing technology and years' experience of our company in the field of researching packaging machineries. It is applicable for various granular products and snacks, such as salt, sunflower seeds, pea-nut, and rice and so on.

Main features:

- It adopts Servo driver to pull the film which achieves automatically bias-correction function.
- Electronic sensor which gives beautiful and smooth bag shape.
- Brands of Electronic elements: PLC system-Siemens, Servo driver-Panasonic, electronic sensor-Panasonic, cylinder-Camozzi Germany, Magnetic valve-MAC USA.
- Auto alarm when no film or film breaks.
- Key parts are stainless steel material, which ensures hygiene.
- It accomplishes bag forming, throwing card in bag, vertical sealing, side sealing, moving, horizontal sealing, cutting, pouching holes, date printing automatically.

Technical parameters:

Technical parameters	Model DXDL
Capacity (bags/min)	50-60
Range of bag length (mm)	150-240 (custom made)
Range of bag width (mm)	85-150 (custom made)
Power (KW)	4.0 (220V,50Hz)
Air source (MPa)	0.6
Air consumption (Kg/Min)	0.6
Out dimension (mm)	1000*1345*1800 (excluding multi-head Weigher)
