

DXDZ250/350 Under-Doing Film Packing Machine

Suitable range

Suitable for the soft, long and bulk type thing, like: towel, facial tissue, noodle, egg roll, sausage, sleeve-fish, ice-lolly, soft sweet, cookies, and fresh fruit.

Main features of function and structure:

1. Double frequency changer control, the bag length instant designing and instant cutting .No need to waste the films when you adjust the bag length. Set a matter at one go. Time and film saving.
2. Human-machine interface, simple and easy to setup the parameters
3. Automatic diagnose the stoppage, the stoppage is clear at a glance.
4. High sensitive photoelectric color code tracing, sealing position input digitalizing, which can make the sealing position more accurate
5. Independent PID control, more ideal for various materials
6. Enable to fixed-position and machine halt, no adhesion to the knife, no film wasting.
7. Succinct driveline, steady performance, and convenient maintaining
8. All the controls are realized by software, convenient to adjust the functions, and easy to upgrade, never falling down.

Alternative device

1. Colored tape printer
2. Ruled middle sealing round
3. Cobweb end-sealing mould
4. Super-big touching screen

TECHNICAL SPECIFICATIONS

Model	ASZB-250X	ASZB-350X
Film with	Max250mm	Max350mm
Bag length	65~190mm or 120~280mm	
Bag with	30~110mm	50~160mm
Product height	Max.40mm	
Film roller diameter	Max.320mm	
Packing speed	40~230bags/min	
Specification	220V,50/60HZ,2.4KVA	220V,50/60HZ,2.8KVA
Machine dimension	(L)3920×(W)670×(H)1320	(L)4020×(W)720×(H)1320
Machine quality	800Kg	900Kg
