

## *Semi-Auto Granary Multi-Heads Balance Packaging Line*

### **Features:**

- \* Suitable range: dosing and weighing of grain, chip, bar or irregular shaped material such as candy, sunflower seed, potato chip, happy fruit, peanut, jelly, freezing rice dumpling, biscuit, chocolate, nut, pet food, puffed food, small metal parts and plastic parts, etc.
- \* Select the optimum combination immediately from plenty weighing combinations by powerful software.
- \* Adopt high precision digital weighing load cell and A/D module to get preciser weighing than before.
- \* LCD operating display with multiple languages such as English, Russian, German, Spanish, Italian, etc.
- \* IP65 whole waterproof and dustproof design. It's easy to clean and maintain.
- \* The powerful ability of Automatic Feeder Control to make the machine self-adjusting during running.
- \* Provided with strong operation menu to make you study and operate more easily. Powerful automatic data statistical function.
- \* Optional devices: triply balance ball, suction hopper, printing device, tolerance sorting device.
- \* Strong compatibility and more compact structure with it directly installed on the upper part of packing machine.
- \* Fast return for investment by largely saving large quantity of raw material and labour cost.
- \* Net weight: 300kg; Gross weight: 370kg
- \* Voltage: 220V; Power: 1500W; Frequency: 50/60HZ; Rated current: 9A.
- \* Out package dimension (mm): 1400(L)×1130(W)×1120(H):

**Technical parameter:**

Weighing range	10-1000g
Maximum weighing quality	3000g
Types of weight setting	50types
Range of weighing precision	±0.3-0.5g
Maximum weighing speed	60 bags/minute
Hopper capacity	1300ml
Hopper type	Bi-row hopper without memory
Driving	Step motor
Preset number for product	99 kinds
Size of machine body(mm)	1150(L)x950(W)x1129(H)
