

Cup Forming Filling Sealing Machine SBM-PM70A

Plastic cup forming filling sealing machine suits for food packaging such as milk, yogurt, chocolate, jam, fruit juice and condiment etc. It features automatic.

Features of plastic cup forming filling sealing machine

1. The machine is specially for food packaging such as chocolate, jam etc. From cup form, fill, seal, cut and product discharge automatically.
2. Machine-tool track type of casting machine-base, taken these processing like backfire, maturing, high benchmark and without distortion.
3. Each box of section processed through professional, equipment, to assure high precision and good exchangeability.
4. Forming, sealing, slitting etc. Parts are all could be adjust freely on the track with triangle string and flat string, strong applicability. Small oversize, save installation space.
5. Reducer adapts parallel-axes bevel wheel, to avoid loose and smooth between chain or strap when it is driving.
6. Stroke can be adjust freely, widely used, ease of operation, stable running.
7. Adapts up and down net pattern concavo-convex to conjugate, multi-step air cylinder, double-heat sealing. Quality sealing.

Technical Info

Model No.	SBM-PM70A
Cutting Frequency(times/min)	10-30 times/min
Max shaping areas and depth(mm)	240X160X26
Air Pressure(kw)	0.4-0.6
Total power	380V/220V 50Hz 6kw
Packing Material	PVC/PS/PET
Pressure(kw)	1.5
Mould Cooling	Tap water or Back water
Overall Dimensions(mm)	2710x720x1600
Weight(kg)	1600
