

Automatic Turntable Feeding Flow Wrapping Line FND-F55OR

- This flow wrapping line is applicable to the wrapping of bar shape products, fine shape and good salability.
- Machine Advantage
- Save space, improve the production capacity effectively.
- High-performance servo motor control.
- Sealing control by AC servo motor, wide range adjustment of film feeding length.
- Film feeding control by servo motor, mechanical ratio automatic recognition, improve the accuracy and speed of film register.
- Data adjust by touch screen, convenient of HMI interface, indicate and detect malfunction.
- The machine automatic detect and adjust the wrapping speed according to condition of products saving wrapping film.

|-------------------------|------------------------|
| Max.Production Capacity | 500bag/min |
| Max.Width Of Film | 200mm |
| Max.Dia Of Film | Φ380mm |
| Shape Of Products | Round Bar/Rectangular |
| Packing Range | Length Of Bag:50-180mm |
| | Dia:15-30mm |
| Packing Material | CPP/PET CPP/BOPP |
| Gross Power | 7KW |
| Power Supply | 3P/380V/50HZ |
| Overall Dimension | 5150x1500x1700mm |
| Net Weight | 1.5T |
