

High Speed Automatic Drink Filling Line Can Filling Machine GD-series

The machine is mainly used for carbonated beverages, beer, Coca-Cola, gas-containing fruit wine etc. It adopts pneumatic control without tank contact to automatically lower the lid, and adopts Isobaric filling technology. The production capacity is variable frequency speed regulation, which ensures the beauty and hygiene requirements of the whole machine. To improve the vacuum in the tank, steam ejector can be equipped according to customer's requirements, and remote monitoring system can be equipped to ensure maximum technical support to customers. This equipment is used in the production of medium and large-scale production.
