

Electrical Induction Foil Sealing Machine FKJ-2000

This is one of the perfect foil sealing machines with sound quality. The machine supplies a sealing solution to various materials of PE, PP and PS film in bottles. The latest and developed technologies adapted to this equipment ensure the speed and accurate work stably.

Structure & Function

- Unique designed electromagnetic board ensures the speed film heating and sealing.
- Super stability of electric current prevent the excessive and insufficient sealing
- Reject system pick out the bottles without film.
- Completely comply to GMP standard.

Parameters

Model No.	Extreme Speed	Diameter of Bottle (mm)	Height of Bottle (mm)	Electricity Supply	Power	Cooling System	Size of Shape(mm)
FKJ-2000	150(bottle /min)	φ25-φ100	30-200	AC220V 50/60Hz	3KW	Water cooling	875x1077x1496
