

Molasses Filling Machine - SBF200

Stainless steel: conforming to food health authentication. The molasses filling machine suitable for packaging the corrosion resistance chemical products.

Works stably, ant jamming, high weighing precision, convenient and easy operation; Weighing feedback proportion track type, overcoming the shortcoming of changes of packaging weight caused by the changes of material proportion.

Servo motor-driven: high precision location, strong torque, long life, adjustable rotational speed.

Speed reducer: low noise, long life and lifelong maintenance.

Packaging weight adjustable at any time, operating condition changeable as necessary, convenient operation.

Adjustment parameter of each kind of product can be stored for later use but not more than ten.

The entire seal air damping glass and stainless steel hopper, clear sound of the material, no dust releasing, with dust exhaust apparatus at the mouth of filling, keeping the workshop clean.

Can adapt the ultra fine dust to the big pellet and so on the many kinds of materials by replacing the screw attachment.

Purpose:

Molasses filling machine: arabic tobacco molasses, US herbs molasses, south Africa tobacco molasses.

Technical Parameter:

Filling speed	20-30 bag/min
Filling capacity	10-400 ml
Consumtion power	1.0kw/220
Dimension:	940mm*877mm*1500mm
Weight	120kg
