

Fruit Juice Filling Machine and Production Line

The Fruit Juice Filling Machine combines the functions of Bottle Washing, Filling, Capping, Sterilization, Drying Package, Labeling, Film Packing on one body, and realizes the whole process of automation.

It is suitable for filling bottles with Apple juice, watermelon juice, bayberry juice, mango juice, pear juice, strawberry juice, orange juice, milk, and also for Sauce and liquid other non-gas beverages.

There is a stirrer inside the material hopper, it can mix pulp juice fully. So the pulp and the juice can be filled at the same time. The machine adopts advanced touch screen panel, reach to Man-machine-interface operation. It's suitable for all different size of bottles, we can change the filling volume in a short time. Do not require any other devices, only need to adjust.

Feature

- High quality SUS304 material., Easy to clean and maintain
- Import parts, improve precision and quality.
- High degree of automation, simple man-machine interface operation display.
- PLC control / touch screen / user interface language optional.
- Suitable for all PET bottles, Glass bottle, plastic bottle and thin wall cans.

Technical Parameters:

Product Name	Fruit Juice Filling Machine and Production Line
Total Power	3P 380V 50/60HZ 2.82KW
Filling Accuracy	±0.5%
Filler	1000-5000ml
Air Consumption	120L-300L/Min
Machine Size	L300*W1200*H2250 or OEM
