

SPL-12 Automatic Vial Capping Machine

SPL-12 Automatic Vial Capping Machine with rolling type antibiotic vial capping machine is designed from the same type in home and abroad. It has been accepted by customers and used in large amount. It apply to seal aluminum plastic cap in the production of powder needle, freezing and drying power needle, blood preparation, oral liquid. The machine can be used alone, also installed in production line. Smooth sealing curl, good sealing, compact structure, accurate locating operating easily and low breakage ratio. One machine cap apply to aluminum plastic cap and common aluminum cap. Use three knives rotating toward outside flexible rolling cap head. Low breakage ratio. Close seal smooth curl. Frequency conversion adjusting speed. Meet the requirements of GMP.

Technical Parameters:

Model	SPL-12
Vial Bottle Size	2-100 ml
Production Capacity	2-10 ml: 120 bottles/min
	25-50 ml: 80 bottles/min
	50-100 ml: 60 bottles/min
Capping Accuracy	> 99%
Noise	< 70 dB
Power	220V, 50Hz, 1.1Kw
Packing Size	1520*900*1400 mm
Packing Weight	450 Kg
