

3 in 1 Water Bottles Filling Machine CGZ 8-8-3

Introduction of Water Production Line:

This washing filling capping machine is mainly used for Non-aerated carbon dioxide drink, such as mineral water, pure water and so on. The machine design is shorten the time for the drink material contact with outside, Increase the sanitation condition throughout economy benefit.

1. Using the wind sent access and move wheel in the bottle directly connected technology; canceled screw and conveyor chains, this enable the change the bottle-shaped become easier.
2. Bottles transmission adopt clip bottleneck technology, bottle-shaped transform not need to adjust the equipment level, only change related the curved plate, wheel and nylon parts is enough.
3. High-speed large gravity flow valve filling valve, filling fast, filling accurate and no liquid lose.
4. Host adopt advanced PLC automatic control technology, the key electrical components from famous company such as Japan's Mitsubishi, France Schneider, OMRON
