

JTB-JA-type glue labeling machine

Purpose and brief

The machine is mainly used for thin-shaped bottle of paste Park labeling is required by the labeling of the bottle into the bucket by the screw into the bottle, the sub-dial to send bottles, labels, boxes sent by the label glued to the plate sizing, sizing sizing label on the disk drive and then sent by the labeling zone, and was adsorbed on the stickers put on, go round and sub-bottle adhesive contact with the bottle sent, and after rolling, self-adhesive on the bottle.

Main technique parameters

Production capacity: 8000 ~ 12000 bottles / h

Applicable specifications: 10ml-20ml bottles of oral liquid bottles or other similar

Labeling rate: $\geq 99\%$

Labeling agent: resin

Power supply: 380V 50Hz three-phase four-wire

Power: 2Kw

Dimensions: 1800 × 780 × 1400
