

Drying Machine RXH-C Series

The air circulating oven is a versatile drying equipment, it is suitable for heating, solidifying and drying material and product in the field of pharmaceuticals, chemical, foodstuff, light industry such as: raw material medicine, Chinese traditional medicine, power granule, crude drug, packing bottle, pigment, dyestuff, dehydration vegetable, foodstuff, plastic resin, electric component, coat, wool, salt, catalyzer etc.

Feature:

- 1) Most hot air is circulated in the oven. The heat efficiency is high and the energy is saved.
- 2) It uses the forced ventilating function, there are adjustable air distribution plates inside the oven, the materials can be dried uniformly.
- 3) The heating source might be steam, hot water, electricity and far infrared, with a wide selection.
- 4) The machine is low in the noise. The operation is in balance. The temperature is controlled automatically.
- 5) The installation and maintenance are easy.
- 6) The application is wide. The machine can be used for drying various materials and is a versatile drying equipment.

Technical Parameters:

Model	RXH12C	RXH-14C
Drying capacity for each time(kg)	50	100
Power (kw)	0.45	0.45
Steam to be consumed(kg/h)	9	15
Air capacity (m ³ /h)	3000	3400
Temperature between the top and the bottom(°C)	±2	±2
Plate for each machine	24	48
Machine Size	1400*1200*2000	2300×1200×2300
Detail	Single door	Double door
